

BATHROOMS2nv

Business of the Month – Bathrooms 2nv

Pete has been qualified to do plumbing and gas for 25 years, and began operating Bathrooms2nv in 2014. Pete decided one day he really loved doing what he did and was presented with an opportunity to help our locals in a more customised and personalised manner, adapting for services that were prevalent in the Redlands. Bathrooms2nv came to life to provide a reliable and local service.

We love to think that we can and do customise each and every client's experience with us to ensure they are getting the best possible service and advice. We have also put great importance to having supportive and quality sub-contractors and suppliers in place so we can maintain our high standards across all the services we provide. Training, reputation and communication are all high on our priorities as part of what we think is important to our clients and community.

People pay for a service, with hard earned money. They expect to get what they are paying for and we believe the same thing - we base our services on providing quality work and advice to the highest of standards for an affordable price. There's no guessing game, no doubts and no need for reservations because we have the same thoughts as our clients!

To keep this business running as a family business, with our son now working alongside Pete, we hope to keep delivering people with their dream bathrooms. Pete has multiple QBCC licences and is registered and member of the QBCC and master builders. Where he can keep up to date on everything.

Motivation: achieving our best but listening to what people want and seeing the client reaction is a fantastic motivation, we also understand the balance of work life and home life. Has Pete had a cardiac arrest last year we also understand the importance of spending time with family and friends.
